# **MERION BLUE GRASS-ZOYSIA JAPONICA LAWNSEED MIXTURE**

We take pleasure in introducing the most remarkable development in lawn seeding in many years. This sensational formula contains grasses which will enable you to maintain a dense carpet of smooth, green turf during the entire growing season from early spring right through the hot summer months until winter sets in.

Our formula contains 45% Merion Blue Grass which has proved its worth as just about the finest of all cool-season grasses. It is a great improvement over standard blue grass as it spreads faster; requires less mowing and withstands closer cutting; resists weeds and diseases. This seed is much smaller, thus less seed is needed to plant a given area.

Zoysia Japonica is the only known grass which thrives best in hot weather when other grasses become dormant and permit weeds to invade lawns. Zoysia actually outgrows Crabgrass and prevents its spreading.

Illahoe Fescue, a new strain of Creeping Red Fescue developed a few years ago, is a perennial grass of fine texture and pleasing color that does well in poor or rich soil and is highly resistant to drought and disease.

By blending these three permanent grasses you get the benefit of all their outstanding qualities. However, as is the case with all permanent grasses, this new formula is not a fast growing one. To overcome this we have added some Red Top, a quick germinating nurse grass which keeps down weed growth until the other grasses become firmly established.

One pound of Merion Blue-Zoysia Mixture covers about 700 square feet. This is more than three times the area planted with standard lawn seed mixtures, thus making our new formula no more expensive.
